# THE CHECKER®
AUDIT / INSPECTION
MANAGEMENT
SOFTWARE

The Checker is a powerful solution that will help you reduce liability while increasing efficiency, safety, and compliance.

THE CHECKER SOFTWARE:

- Conduct and manage your inspection processes on any device / OS.

- Increases the efficiency and accuracy of audits, inspections, and other assessments like JHSC, Pre-Start, etc.

- Gives you the capability to instantly communicate results and automate action steps.

- Automatically archives results for compliance assurance and analysis.

- Passes the "works-in-real-life test."

- Is designed with the end user in mind based on our years of experience in improving inspection processes.

INSPECTING IS SMART BUSINESS

SOLUTIONS FOR ALL INDUSTRIES

Take your inspection program to the next level.

FEATURES AND FUNCTIONS

- **The Checker Builder** – Create your own audits and checklists.

- **Online Checklist Library** – 100s of pre-built checklists.

- **Easy Administration** – Simple to set up, manage, and monitor.

- **Notifications** – Reminders, alerts, scheduling tools, emails, and PDFs keep everyone in the loop and on task.

- **Flexible configuration**—Give and control access to users across the organization (inspectors, auditors, reviewers, JHSC, management, etc.)

- **Dashboards** – Configurable dashboards allow you to monitor activity, see key metrics in one place, and easily communicate.

- **Reports** – Track and manage activity with automatically generated reports.

- **Analytics** – Use historical data to identify issues, spot trends, and gain valuable insight into your inspection processes.

- **Voice Annotation** – Add voice notes to any audit or inspection.

- **Video/Images** – Attach a video or picture to any audit or inspection.

- **Image Annotations** – Make notes directly on images and save them for others to review.

- **Risk Assessment/Class Hazard Rating** – Assign and use custom values.

- **Audit Scoring** – Set up weighted point values for any item and easily convert to percentages.

ADD-ON PRODUCTIVITY MODULES

- **Actions Module** – Includes work orders, corrective actions, requisitions, and discrepancies.

- **Info Manager** – Add best practices, company policies, regulations, tips, and images specific to your inspection processes.

- **Barcode Reader** – Track, identify, inventory, and manage any asset affixed with a barcode, as well as allow users instant access to the right checklist.

- **Advanced Analytics** – Highly detailed reporting and intelligence (including GPS data), including customizable dashboards for management users.

18,000,000 and counting...

In the past 17 years, The Checker has been used for more than 18 million audits and inspections by companies of all sizes throughout North America.
